> berman": The Pacicic Northwest makes a wonderful appeal to every visitor. It is a land of no strength, with the top value Ed Carlen, dito living waters, of golden soil, of for arrivals at \$6, although it is Chas Turner die and remineral wealth beyond compre- quite possible that a fraction ovhension, of forests which will er this would be obtainable for M Chevalter, clerk of bless mankind when other lands top quality. This, however, is are desolate; a land of mountain, not putting in appearance just L. J. Besenberg, dita . . . plain and valley; of a people now. great in intellect, energy, endurance, and kindliness. In this polden Northwest, in a climate without the harshness of the North or the enervating softness of the South, these people are building an empire, They have harnessed the streams for power, ar, pouring them over the plains, have produced fruitful fields and gardens; they are wresting from the earth its mineral wealth; they are converting the forests into forms of utility and beauty; I they are building schools and colleges; the Bible vision of every man dwelling under his own vine and fig tree is realized here, where his every bodily need and intellectual want may be gratified. The natural wealth of the country is great and great are its achievements, but better than all this are the people themselvesa chosen race growing in numbers and in all the accomplishments and graces which make a people mutually useful and happy."

HAD EXPEIENCE WITH WHEAT

Mr. Crowley is Quite Sure Trouble can be Entirely Eliminated by Uning Simple And Inexpensive Preventatives,

3 00 recent issue of your paper an ar- A To persons found huntwas causing to the growers of to the full extent of the law. 3 to I have raised considerable wheat in my time, as well as barley. 18.30 About 1840 my attention was first called to how they treated a oo wheat where I was born.

6.00 foul seed then heaped the seed counts due us, the same have been 6 00 wheat on the floor and sprinkled plac d with Mr. C. H. Leonard. A it with water until it was wet, year having slapsed since the disa co coarse sieve and covered the settlement of the same is requested. 6 00 seed, shoveling the wheat over 6 00 and over until it was all whitewashed. This was allowed to lay until the following day then 3 00 SOWn.

At any rate it would not cost 300 much to try such an experiment. In 1854 Major Bidwell of Chico

100 California, commenced to raise wheat and barley. Neither were 23 00 troubled with smut but in 1855-6 3 00 armed. About that time a doct-3 00 or had a letter published in one of the Sacramento papers advis-3 00 vitriol water. Some followed 300 this advice, others didn't. Those 3 00 who dipped had no smut, the oth-3 00 ers had.

3 on wheat using 1 lb to 800 lbs of wheat and was not troubled with 100 smut. Barley and oats should be treated in the same manner. 00 tight floor; wetting it good be-300 fore applying the blue stone. en bucket with hot water then mix with water in a barrel to see the right proportion. Sprinkle 300 the seed with this and as the water runs off sweep it back, at the same time shovel the seed 300 over and over until it has taken 3 00 up all the water and is reasonably dry. Allow it to remain on 200 the floor until the following so morning when it may be sacked and sowed. I'll bet grain treatoo ed in this way will not cause any 3 00 threshing machine to blow up from smut.

"Uncle Sam" has another meno thod that has proven quite efso fective and is cheap. It is the water cure-not the keeley cure. 3 00 He treats wheat to hot water-92 degrees F. I tried the plan an two seasons and had no smut. I placed the seed in a large iron boiler and kept a good fire under

it. I thought I would improve on "Uncle Sam" and treated my barley to 100 degrees-it takes During the butchering season considerable heat to kill the of the year the Experiment Sta- germs. Grain treated in this
